

**Subject: Invitation to Tender – Inserts from WC Powder**

Dear Recipient,

We are initiating a project to produce milling inserts using raw material (WC powder) supplied by our second company. If you would like to participate in this order, please contact:

■ [verkauf@tungstencarbidepowder.com](mailto:verkauf@tungstencarbidepowder.com)

To begin, you will need to send a specification sheet of your standard WC powder used for milling applications. Based on this, they will provide you with a quotation.

This initiative is part of a **buying group** organized by our headquarters in the UK, in collaboration with other metalworking companies. The planned quantity exceeds **90,000 inserts**. Please note that competition will not be compromised—we are inviting tenders from multiple suppliers.

At this stage, only powder specifications are required. Sensitive data such as insert types and other technical details will be shared at a later stage of the tender process.

We kindly ask you to contact the raw material supplier directly and submit your powder specifications to enter the tender. Further pricing and details will then be communicated.

Best regards,

**William Apex Metalworks**
